

Complimentary DENTAL HEALTH SCAN

3D video
No radiation

Evaluate your risk factors for

- Gum disease
- Recession
- Bone loss
- Tooth wear
- Decay
- Movement

Schedule
today!

Vibrant Color Scanning:

Realistic color images make it easier to distinguish between gingival and dental tissue for more precise clinical evaluations.

iTero Time Lapse Technology:

Compare historical and current scans and quantify important oral changes (in gum level and tooth wear over time) – helps visualize changes in-order to reach care decisions in a more engaging and informed way.

Invisalign® Outcome Simulator:

Helps visualize actual potential benefits of Invisalign treatment.

Technology to Help Restore Smile:

Preserve a copy of your smile. This helps us restore your smile back to what your teeth looked like before an accident using copy/paste technology.
